A. INTERPRETER / CULTURAL NEEDS

- An Interpreter Service is required? Yes No
 If Yes, is a qualified Interpreter present? Yes No
 A Cultural Support Person is required? Yes No
 If Yes, is a Cultural Support Person present? Yes No

B. CONDITION AND TREATMENT

The doctor has explained that you have the following condition: *(Doctor to document in patient's own words)*

.....

.....

This condition requires the following procedure/treatment/investigation. *(Doctor to document - include site and/or side where relevant to the procedure)*

.....

.....

The following will be performed:

A cerebral aneurysm is an abnormality and weakness in the wall of a blood vessel in the brain. This operation is performed to enable a titanium clip to be placed on the neck of the aneurysm to prevent it from bleeding.

A cut is made over the area where the brain needs to be opened. A segment of skull bone will be removed. A titanium clip is placed across the neck of the Aneurysm.

The skull bone is put back and is closed with metal plates and screws.

The cut closed with stitches or staples.

C. RISKS OF A CRANIOTOMY & CLIPPING OF ANTERIOR CEREBRAL ANEURYSM

There are some risks/complications with this procedure/treatment/investigation.

Common risks include;

- Infection. This may need antibiotics and further treatment.
- Minor pain, bruising and/or infection from IV cannula site. This may require treatment with antibiotics.
- Bleeding. A return to the operating room for further surgery and a blood transfusion may be required if bleeding occurs. Bleeding is more common if you have been taking blood thinning drugs such as Warfarin, Asprin, Clopidogrel

(Plavix or Iscover) or Dipyridamole (Persantin or Asasantin).

- A heart attack because of the strain on the heart.
- Stroke or stroke like complications can occur which can cause weakness in the face, arms and legs. This could be temporary or permanent.
- Injury to the brain, important nerves or blood vessels. This can lead to stroke or stroke like complications can occur which can cause weakness in the face, arms and legs. This could be temporary or permanent.
- Memory disturbance or confusion. This could be temporary or permanent.
- Fluid leakage from around the brain can occur after the operation. This may require further surgery.
- Epilepsy which may require medication. This condition may be temporary or permanent.
- The clipping of the aneurysm may not be technically possible. This will result in reduced protection from rupture of the aneurysm.
- Loss of vision which may be temporary or permanent.
- Meningitis. This would require further treatment.
- Coma.
- Death is possible due to this procedure.

Uncommon risks include;

- Decrease in your normal body salt concentration. This may require admission to intensive care.
- Small areas of the lung may collapse, increasing the risk of chest infection. This may need antibiotics and physiotherapy.
- Increase risk in obese people of wound infection, chest infection, heart and lung complications, and thrombosis.
- Clots in the leg (deep vein thrombosis or DVT) with pain and swelling. Rarely part of this clot may break off and go into the lungs.

Rare risks include;

-

D. SIGNIFICANT RISKS AND PROCEDURE OPTIONS

(Doctor to document in space provided. Continue in Medical Record if necessary.)

G. PATIENT CONSENT

- I acknowledge that the doctor has explained;
- my medical condition and the proposed procedure/treatment/investigations, including additional treatment if the doctor finds something unexpected. I understand the risks, including the risks that are specific to me.
 - the anaesthetic required for this procedure/treatment. I understand the risks, including the risks that are specific to me.
 - other relevant procedure/treatment options and their associated risks.
 - my prognosis and the risks of not having the procedure/treatment.
 - that no guarantee has been made that the procedure/treatment will improve my condition even though it has been carried out with due professional care.
 - the procedure may include a blood transfusion.
 - tissues and blood may be removed and could be used for diagnosis or management of my condition, stored and disposed of sensitively by the hospital.
 - if immediate life-threatening events happen during the procedure, they will be treated accordingly.
 - a doctor other than the Specialist Neurosurgeon may conduct the procedure. I understand this could be a doctor undergoing further training.

I have been given the following Patient Information Sheets;

- About your Anaesthetic**
- Craniotomy & clipping of Anterior Cerebral Aneurysm**
- Blood & Blood Products Transfusion**
- I was able to ask questions and raise concerns with the doctor about my condition, the proposed procedure/treatment/ investigations and its risks, and my treatment options. My questions and concerns have been discussed and answered to my satisfaction.
- I understand I have the right to change my mind at any time before the procedure/ treatment/investigation, including after I have signed this form but, preferably following a discussion with my doctor.

On the basis of the above statements,

I REQUEST TO HAVE THE PROCEDURE

**Name of Patient/
Substitute decision
maker and relationship:**

Signature:

Date:

Substitute Decision-Maker: Under the *Powers of Attorney Act 1998 and/or the Guardianship and Administration Act 2000*. If the patient is an adult and unable to give consent, an authorised decision-maker must give consent on the patient's behalf.

H. DOCTOR'S STATEMENT

I have explained to the patient all the above points under the Patient Consent section (G) and I am of the opinion that the patient/substitute decision-maker has understood the information.

**Name of
Doctor:**

Designation:

Signature:

Date:

**Name of
Anaesthetist:**

Designation:

Signature:

Date:

I. INTERPRETER'S STATEMENT

I have given a sight translation in

(state the patient's language here) of the consent form and assisted in the provision of any verbal and written information given to the patient/parent or guardian/substitute decision-maker by the doctor.

**Name of
Interpreter:**
